PROFESSIONAL SUMMARY

Artificial Intelligence undergraduate with expertise in Full-Stack Development, Backend Engineering, and AI-powered application development. Proficient in Java, Python, JavaScript, React.js, Node.js, Express.js, MongoDB, SQL, and Data Structures & Algorithms. Built scalable end-to-end applications, intelligent automation systems, and AI-driven solutions through academic and personal projects. Demonstrated strong problem-solving, analytical thinking, and software development skills, with a passion for designing innovative technologies that address real-world challenges. Seeking opportunities to contribute technical expertise while continuously learning and growing as a Software Engineer.

EDUCATION

Bachelor of Technology in Artificial Intelligence

2023 – 2027

Parul University

CGPA: 7.62/10

Intermediate (Class XII)

2021 – 2023

Oxford Junior College

Percentage: 78.6%

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Frameworks / Tools: React.js, Node.js, Express.js, MongoDB (MERN Stack), Django, Git, GitHub, VS Code, Postman

Core Subjects: Data Structures and Algorithms (DSA), Database Management Systems (DBMS), Object-Oriented Programming (OOP), REST APIs, Problem Solving

PROJECTS

Gen-AI Placement Management System

Jan 2026

MERN Stack, Artificial Intelligence, Web Development

- GitHub: <https://github.com/vamsivalluri-19/gen-ai-placement-management-system>
- Developed a placement management platform supporting 1500+ student records with resume analysis and automated recruitment workflows to streamline student recruitment and campus placement activities.
- Implemented student profile management, company job postings, aptitude tracking, and AI-based resume analysis features.
- Integrated secure authentication, dashboard analytics, and real-time placement management workflows using MERN stack technologies.

Satellite Crop Health Monitoring System

Jan 2026

Artificial Intelligence, Agriculture Technology, Web Development

- GitHub: <https://github.com/vamsivalluri-19/satellite-crop-health>
- Built an machine learning based agricultural platform with satellite crop analysis and image-based disease detection.
- Integrated satellite imagery analysis, weather forecasting APIs, soil pH monitoring, and crop recommendation models using machine learning techniques.

Fake Account Detection System

Jan 2026

Artificial Intelligence, Machine Learning, Data Analysis

- GitHub: <https://github.com/vamsivalluri-19/fake-account-detector>
- Developed a machine learning-based system to identify fake social media accounts using profile and behavioral features.
- Applied data preprocessing, feature engineering, and classification techniques to improve detection accuracy.
- Evaluated multiple machine learning models and optimized performance through validation and testing.

CERTIFICATIONS

The Complete Full-Stack Web Development Bootcamp – Udemy

Nov 2025

- Learned full-stack web development including HTML, CSS, JavaScript, Node.js, Express.js, React.js, MongoDB, and REST APIs.
- Built responsive web applications with authentication, backend integration, and database management.

SQL Database Certification – Udemy

Aug 2024

- Gained hands-on experience in MySQL, relational database systems, and query optimization.

EXTRA-CURRICULAR ACTIVITIES

- Participated in hackathons, coding challenges, and AI workshops to strengthen problem-solving and development skills.
- Solved programming and algorithmic challenges using Java and Data Structures concepts.
